## PROFILE

First-year B.Tech student in Computer Science and Engineering (Cyber Security) at VIT Vellore, with hands-on experience building Python applications, database-backed systems, and an AI-assisted IoT security monitoring prototype. Interested in secure software development and white-hat cybersecurity, with a focus on strengthening programming, networking, and security-analysis skills.

## PROJECTS

### TrustLens AI — IoT Security Monitoring Prototype

*Cloud Nexus 2026 Hackathon | Python, MQTT, Machine Learning, Streamlit*

- Built a software-based IoT telemetry simulator and used MQTT to transmit device events for analysis.
  - Combined rule-based checks, risk scoring, and an Isolation Forest model to flag potentially suspicious device behaviour.
  - Presented telemetry and security alerts in an interactive Streamlit dashboard.

GitHub repository

### Flight Reservation System

*Semester 1 Project | Python, MySQL, CSV, Tkinter*

- Developed a flight-booking application for customer records, flight management, seat selection, booking, cancellation, and booking history.
  - Used MySQL for application records and CSV files for per-flight seat matrices; included a basic Tkinter interface.
  - Collaborated with a three-member team using GitHub.

GitHub repository

### Live Stock Price Tracker

*Course Project | Python, GNU Octave*

- Built a Python GUI application to fetch and display live stock-market data.
  - Used GNU Octave to create an implied-volatility surface and document applications of multivariable calculus and PDEs in quantitative finance.

## EDUCATION

**Vellore Institute of Technology (VIT), Vellore** | 2026–2030 (Expected)

B.Tech, Computer Science and Engineering (Cyber Security)

**Class XII — CBSE** | Scholar English Academy, Surat | 93.2%

**Class X — CBSE** | Hills' High School | 95.8%

## TECHNICAL SKILLS

**Programming**
Python (intermediate), C (beginner–intermediate)

**Databases**
MySQL

**Frameworks / GUI**
Streamlit, Tkinter

**Tools**
Git, GitHub, Linux, Kali Linux, GNU Octave

**Cybersecurity**
IoT security fundamentals, MQTT; currently building foundational security skills

## ACHIEVEMENTS

**Neo Codeathon — VIT SCORE Edition**
Secured 11th position; certificate recognises a top-25 rank. Held 15–16 Oct 2026.

**Cloud Nexus 2026**
Participated in a 24-hour hackathon and developed TrustLens AI.

## WORKSHOPS

**PCBify 2.0** and **GameSmith**
Participation certificates, graVITas'26, VIT (Sep 2026).

## ACTIVITIES

Member, The Electronics Club (TEC), VIT Vellore.

## STRENGTHS

Team collaboration
Project development
Analytical problem-solving
Willingness to learn
